

# BMR

RGB LED Ring

Order # 725.218

## DESCRIPTION

The BMR LED ring is used in conjunction with the MPC 22/23 boundary microphones or those microphones of the Classis BM series. It is used to indicate the status in tele or video conferences and illuminates in different colours. The BMR LED ring is controlled via a media control system or the logic output of a DSP mixer. The BMR LED ring is supplied with a light conductor, a jumper and a housing containing the PCB.

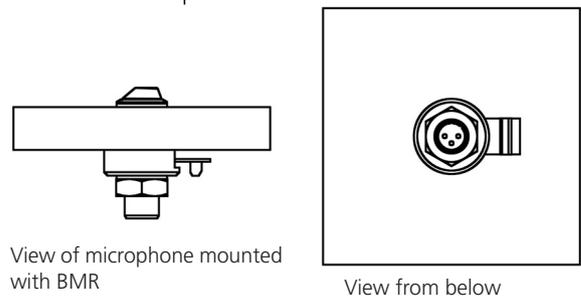

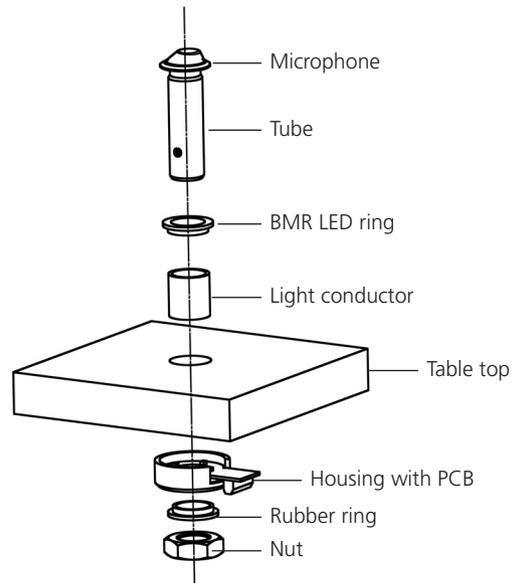

## TECHNICAL SPECIFICATIONS

Voltage for all colours . . . . .	12 V ±0.5 V
Current – Red . . . . .	20 mA
Current – Green . . . . .	12 mA
Current – Blue . . . . .	15 mA
Wavelength Red . . . . .	630 nm
Wavelength Green . . . . .	525 nm
Wavelength Blue . . . . .	465 nm
Connection screw terminal	
Conductor cross-section flexible . . . . .	0.08 mm <sup>2</sup> - 1.0 mm <sup>2</sup>
Flexible with cable end sleeve . . . . .	0.14 mm <sup>2</sup> - 0.5 mm <sup>2</sup>
Drilling diameter table top . . . . .	24.5 mm

## MOUNTING

- For the components drill an appropriate hole into a table top or similar. Shorten the light conductor in accordance to the thickness of the table top.
- Mount the individual components as shown in the illustration below.
- Put the light conductor, the BMR LED ring and then the boundary microphone from above into the table top.
- From below slide the housing with the PCB and the rubber ring over the tube of the microphone. Attach all components by tightening the nut.
- Connect the PCB to your media control system or the logic output of a DSP mixer according to your choice of colours and the technical requirements. Please note the required voltage of 12 V.

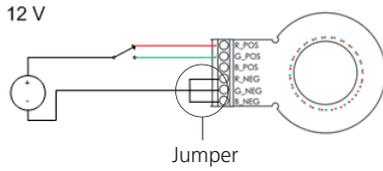

## SUPPLIED ACCESSORIES

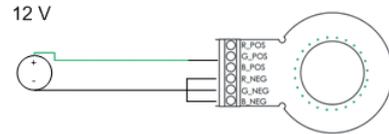

# BMR

## APPLICATION EXAMPLES

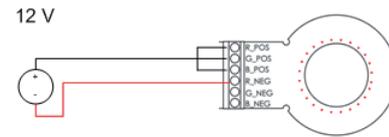

Example: red/green, common GND

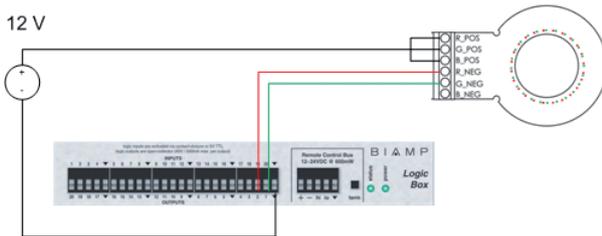

Example: Green, Common GND

Example: red, common V+

Example: red/green, common V+  
With BIAMP Logic Box

Example: red/green, common V+
